SUMMARY

I am Frontend Developer with expertise in React.js with over 3 years of experience passionate about creating dynamic, and user-friendly software solutions for a global user base and contribution to an innovative SaaS Platform. Thorough understanding of React.js core principles like hooks for reusable logic, lifecycle methods, and context API. I've develop and maintain over 20 different project using Javascript, Typescript, React.js, Next.js, and TailwindCSS, where i focus on problem-solving, understand business requirements and translate them into technical implementations, build reusable React components, Debug, and optimize front-end performance to deliver fast loading pages. I'm eager to improve my skills and stay up-to-date on the latest web development trends, and advancements in React.js and related technologies.

EXPERIENCE

Open Source Contribution

Link : [Activist](#)

March 2026 – Current

- Refactor over 10 Modal Component and centralized state global using pinia in Vue.js
- Improved front-end performance by optimizing component mounting strategy, making web fast-loading pages and seamless user experiences
- Write clean, maintainable code that adheres best practice and coding standards
- Contributed to code quality and testing standards, achieving 90%+ test coverage with Vitest and Playwright
- Participated in collaborative development workflows, including debugging, testing, and iterative improvements

Full stack Developer

Fastwork | Freelance

January 2024 – March 2025

- Maintained and add small feature scalable full-stack web applications using React.js, Next.js, and TailwindCSS delivering end-to-end user experiences
- Problem Solving and resolved production issues, reducing bugs by 5% and improving system reliability
- Designed and integrated RESTful APIs, ensuring efficient data flow and reducing latency by 20%
- Worked in a remote and agile environment, contributing to discussions, reviews, using Git, and continuous improvement

PROJECTS

Belilar – E-commerce Web Application

Link: <https://belilar.vercel.app/>

Tech: React, Next.js, REST API, Tailwind, Prisma ORM, MongoDB

- Built a full-stack e-commerce platform with scalable architecture using React, Next.js, Node.js, and TailwindCSS
- Designed and implemented end-to-end features including authentication, payment, and product management
- Integrated APIs and optimized data flow, ensuring smooth and responsive user experience
- Maintained cross-browser compatibility and high performance across multiple environments

ChatAI – AI Chat Web Application

Link: <https://www.chatai.my.id/> Tech: React, Next.js, Tailwind CSS, Shadcn UI, ExpressJs, MongoDB

- Developed an AI-powered web application with real-time interaction and optimized API communication
- Built reusable and scalable UI components using modern frontend architecture
- Optimized API performance with response times under 150ms and real-time latency under 300ms
- Focused on usability, performance, and maintainable frontend structure

SKILLS

- Frontend: HTML, CSS, JavaScript, TypeScript, React.js, Next.js, TailwindCSS, React Native
- Tools & Workflow: Git, GitHub, Agile Development
- Core Strengths: Frontend Development, Problem Solving, Thorough understanding of React.js core principles, Performance Optimization, Debugging, Communication Skills

EDUCATION

Bachelor’s Degree in Computer Science Grade: 3.58
Nusa Putra University
